

SUPER AN PIGMENTS-CF

Leather Auxiliary

Technical Information

Nature :

Highly concentrated pigments without any binder.

Analytical Data :

Appearance	:	Coloured pourable liquid
Particle Size	:	Less than 5 micron
pH	:	7% - 7.5%
Charge	:	Anionic

Behaviour :

These pigments have very fine particle size and produced with good quality organic and inorganic pigments. The dispersants contained in this series are the minimum to maintain a stable pigment dispersion during long term storage. These pigments have the following properties.

1. Excellent covering power.
2. Brilliant shades.
3. Good fastness.
4. Light & migration fast.
5. Excellent heat resistance.
6. Good storage stability.

The following shades are offered in this series.

Black, White, Red, Green, Yellow, Blue, Maroon, Brown, Beige etc.

We also provide shade matching of any shade.

Storage :

Non dangerous product, store between 5⁰C to 40⁰C

Recommendations are based on current knowledge and experience but without engagement and warranty.
