

SUPER LAC-WS

Leather Auxiliary

Technical Information

Properties :

Plasticized Nitrocellulose Top Coat Dilutable in both Aqueous and Solvent Media.

Appearance	:	Clear Transparent pale viscous liquid
Solid matter	:	33% ± 1%
Solubility	:	Readily soluble in water & organic solvents
Gloss	:	Medium to high
Film Character	:	Soft

Salient Characteristics :

- Very soft handle.
- Excellent dry & wet rubfastness.
- Waxy smooth touch.
- High abrasion resistance.
- Excellent flexural endurance.
- Excellent cold crack resistance.

Mode of Application :

SUPER LAC-WS can be used on all kinds of leathers requiring very glossy look & high abrasion resistance. It can also be mixed with the sealer for better rubfastness and gloss. The dilution may vary from 1:1.5 to 1:2 in both medium organic solvent & water with 1 to 2 cross spray depending upon the desired gloss and rubfastness.

Store Stability :

Can be stored in a cool Place (Well Packed) upon one year.

Recommendations are based on current knowledge and experience but without engagement and warranty.
